

The Ten Lepers

And the one who was grateful was a *Samaritan!*

Most unlikely!

Praise God, Leptosy has been cured. Thanks to the Gates Foundation" Polio too.

Recommended: *The Mind of Bill Gates on Netflix.*

So who are the Lepers today?

How about the migrant children separated from their parents?

Or the sick migrant children the administration wants to send back to where there is no medical treatment available?

The Catholic press declares this Pro Life Month and triumphs anti abortion.

O.K....but what about the children who are already born and are lepers in our midst?

And so we pray:

With Saint Francis,

SaintÂ Saint Theresa

And the Guardian Angels

whose feasts we celebrate:

Angels of God, our guardians dear,

let the little LeperÂ children

come to him.

Amen
